

Jill thought vermiculture
was not an easy way to
compost at home.

Tel: 250-287-1625

Saturday, July 17th at 11am

Join compost educator **Elaine Jansen** as you learn how to make a worm bin composter for under \$10.00. These bins are the perfect size for use in small apartments or under the kitchen sinks. Vermiculture is the "technique" of using worms to create natural fertilizers or compost. It is an EASY way to compost for beginners and experts alike. Pre-registration is required. Contact Elaine at 250.287-1625.
