

# SkyRocket is Back!

**Popular biosolid compost goes on sale  
Monday, August 30th**

SkyRocket is a popular, nutrient-rich soil amendment for lawns and gardens, created by the Comox Valley Regional District by composting a mixture of wood chips and biosolids.

Safe, effective and environmentally friendly, SkyRocket has been tested for pathogens, and metal content. Test results meet the stringent Class 'A' requirement of the Organic Matter Recycling Regulation of the provincial Ministry of the Environment.

## **SkyRocket Sales**

**SkyRocket is available for sale starting August 30th, 2010. Based on recent public feedback the CVRD will now be holding 20 percent of the total production volume in reserve for residential customers. The remainder of the product will be available to both commercial and residential purchasers on a first come – first served basis.**

## **Bulk Rates**

- Minimum charge of \$50.00+HST (3.5 cubic yards)
- Less than 12 cubic yards, \$16.00/cubic yard (\$21.00/m<sup>3</sup>)
- 12 to 21 cubic yards, \$12.00/cubic yard (\$16.00/m<sup>3</sup>)
- Greater than 21 cubic yards, \$10.00/cubic yard (\$13.00/m<sup>3</sup>)

## **Location for pick up and purchase**

### **CVRD's Biosolids Composting Facility**

3781 Bevan Rd. Cumberland BC

(1.5km past the waste management centre)

Payment by cash, cheque, credit card or debit.

**Hours of purchasing and loading: 9:00am to 4:00pm**

## **Use of the product**

Skyrocket is ideal for use in large scale landscaping and planting projects and can also be used for residential landscaping.

SkyRocket should be use as a soil conditioner or supplement, rather than as a topsoil or fertilizer. It can be applied annually or as recommended by soil analysis.
