

Trail Option 2

Design:

- Shared multi-use trail for pedestrians, bikes and horses.
- Wider than village trail section.
- 2 – 3 m wide, packed 1" minus gravel.

Pros:

- Construction cost comparable to option 1.
- Wider trail makes it easier for horses to stay to one side of trail.

Cons:

- It may be difficult to keep horse use to one side of trail, trail surface may get stirred up by horses if there is a lot of horse use.
- Ongoing maintenance moderate to medium.
